

CARE & MAINTENANCE

COCO  WOLF

MADE FOR LIFE. OUTDOORS

MATERIALS AND CARE

At Coco Wolf we consistently seek the perfect balance between inspiration and innovation. Our collections are a result of dedicated craftsmanship, our commitment to timeless design, and a true passion for the outdoors.

We proudly hunt out the optimum materials, many of which have been sourced via the marine industry to ensure they withstand the test of weather and time.

We want you to enjoy outdoor living without compromises and creating products that are easy to maintain and clean is part of that promise.

WHATEVER THE WEATHER...

Coco Wolf furniture is designed for year-round outdoor use. We've taken our inspiration from the best maritime designs, using hardwearing, water-resistant construction and upholstery materials to create low-maintenance furniture pieces that are built to last.

Frames are constructed from Iroko, a hardwood often chosen for its durability. Naturally resistant to decay, Iroko flexes with changes in temperature and humidity, reducing the likelihood of cracking and splintering. We finish exposed wood with a scratch- and weatherresistant varnish to offer extra protection from the elements and from scuffing and stains.

Our designs incorporate features that resist water pooling and speed up drying time. Hidden drains channel water away from frame and fabrics, while the unique base profile is fitted with marine-grade mesh to allow for efficient drainage and increased air circulation. All seats and cushions feature a ventilated back; our recommended coverings comprise a range of breathable acrylic fabrics that are treated to allow liquids to bead and run off. Special seat and cushion inners enable water to pass through quickly.

Only rust-free metal components are used, including galvanised springs and stainless-steel staples and nails.

COMFORT AND DURABILITY THAT'S SECOND TO NONE

Coco Wolf furniture cushions are designed for superior performance in the year-round outdoors.

The pad's internal structure is highly breathable and water-permeable, providing a quick-drying action that's ten times faster than standard polyurethane foam and polyester fibre cushions.

The mouldproof, antibacterial and chlorine-resistant filling is ideal for marine or seaside locations. Fully stress tested (to 80,000 compressions) and engineered for comfort.

IROKO WOOD

Our preferred choice of wood for frames and legs is Iroko, a hardwood chosen for its strength and extreme durability.

It expands and contracts depending on the environment, which reduces the possibility of cracking or splintering.

It is naturally resistant to decay and is commonly used in the marine industry as it can stand up to the elements year after year.

A UV, weather and scratch resistant finish lacquer is applied to all the show wood in Coco Wolf designs available in 11 different shades.

CARE & MAINTENANCE

Day to day

Solid Iroko is easy to maintain; use a damp cloth to remove soil and dry with a soft cloth. Do not use any solvent products as this will damage the finish lacquer.

Over time

Over time to look after dents, marks or to touch up worn out areas Coco Wolf supply touch-up paste and a bottle of lacquer to match the wood finish of your furniture.

Follow the steps below:

- Where needed lightly sand down the area and apply the paste to fill in the dent, once dry use the brush provided or a soft cloth to apply the wood lacquer over it.
- Allow the lacquer to dry (around 15 min) and rub with a clean lint-free cloth to remove excess, following the wood grain.
- Repeat as necessary to achieve the desired finish. Allow each coat to dry for four to six hours between applications.

FABRICS

Coco Wolf has curated an exclusive selection of high-performance fabrics to complement our range of collections with the latest technology to remain outside all year round, making it perfectly suited to all environments.

We offer a full range of plain and patterned fabrics produced at some of the world's top mills. Fabrics are chosen specifically to suit both contract and residential applications, including FR treated fabric range.

All solution-dyed acrylic fabrics in the Coco Wolf collection are engineered to combine the highest level of design and performance and are fade resistant, mildew- and mold-resistant, pool and seawater resistant, stain resistant and breathable. They are bleach cleanable and easily maintained.

CARE & MAINTENANCE

Day to day

Vacuuming and removing any loose dirt from the surface will keep your fabrics like new. Spills should be removed immediately. Sponge briskly with a 1:20 solution of mild detergent to water. Allow the cleaning solution to soak into the fabric and rinse thoroughly with clean water and air dry.

Stain removal

Chlorine bleach will not affect the colouration of the solution- dyed acrylic fiber and is therefore acceptable for stubborn stain removal, including mildew. We suggest a diluted solution of one part bleach to two parts water. Thorough rinsing is always essential.

HANDWOVEN ROPE

The handwoven rope used in our Coronet collection is specifically made for outdoor use. Marine standard materials result in a product that is highly resistant to the wide range of outdoor elements, including UV rays, incremental weather, abrasion, chlorine, and saltwater.

The rope is 100% polyester, has antibacterial properties and is dyed in compliance with Oeko-Tex regulations and is also completely recyclable.

CARE & MAINTENANCE

Day to day

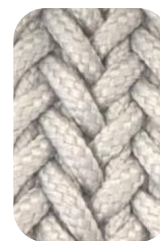

To clean the dirt and dust that may embed between the rope weave, simply wash the furniture with low-temperature water and allow to air-dry naturally. Neutral PH soap solution can be used to effectively clean residue or marks.

MARBLE

Beautifully cut from high-quality marble sourced from Italy, marble is an extremely hardwearing material that provides the perfect table top or surface for the living and dining spaces indoors or out.

As marble is a porous rock Coco Wolf honed finish table tops are sealed with Lithofin MN Stain-Stop which creates a water-resilient barrier and prevents stains from setting in.

CARE & MAINTENANCE

Day to day

The sealing of the marble should prevent the absorption of most liquids provided they are mopped up quickly and wiped down with a damp cloth. Normal cleaning requires only a light cleaning with a mild detergent solution (scouring pads should not be used). Do not use any abrasive or ammonia-based cleaners, limescale removal product or any products containing acetone, chlorine or solvents as it may permanently damage the surface, making it look opaque with marks.

Stain removal

In case of stains caused by liquids or greasy substances, immediately remove it with an absorbing cloth dampened with lukewarm water carefully to avoid scratching the surface.

General protection of marble surface to extend its lifespan

Protect the surface and do not leave potted plants or flower arrangements on the table for a long period of time, as it can be potentially corrosive. Do not put hot dishes directly onto the surface of the table. Spillages of products that contain acids such as lemon juice, red wine, perfume, bleach or industrial cleaning agents, these should be wiped as quickly as possible and then cleaned as above.

Every six month or yearly (depending on the use of the table)

While the sealants can last for over a year, it is impossible to predict the life expectancy of any surface treatment to stone. Coco Wolf suggest resealing after the initial six months and then once a year if the table top is in regular use.

Commercial use:

Depending on the usage as described above we recommend that a professional stone cleaning company is contracted after the initial six months to inspect the surface and on-going at least once a year to deep clean the stone surface and reapply the seal if required.

PORCELAIN

The hard-wearing and versatile qualities of porcelain stoneware make it an ideal choice for our table collection. Impressive surface hardness withstands wear and scratching, high loads and high temperatures, while being resistant to chemicals and colour change whilst being extremely easy to care for.

CARE & MAINTENANCE

Day to day

Remove dust by using a dust control cloth or a damp cloth. The surface can be cleaned with a Ph Neutral detergent, using a clean cloth.

Stain removal

If there is a big spill, remove fresh stains as soon possible with an absorbing cloth, use a stone cleaner solution and simply wipe off with a wet sponge.

General protection of porcelain surface to extend its lifespan

- Prevent collisions with the most exposed points like corners and edges.
- Avoid using metal or abrasive pads.
- Do not use knives with a ceramic blade because the hardness of the two materials is very similar.
- Do not place hot objects (such as frying pans, pots, coffee pots, etc) directly on the surface.

Coco Wolf tailored rain coats will be the best winter accessory for your outdoor setting or if your furniture is not in use for prolonged periods. Simply remove the covers when you are ready to entertain outdoors, and your setting will be ready to go – no cleaning necessary!

Made from a specially formulated advanced Nanotechnology fabric, giving a unique water-resistant coating to ensure long term protection for your furniture, they prevent moisture build-up on cushions overnight.

- Fully waterproof
- Breathable fabric
- Extremely durable and stretchy

Rain coats are tailored to each piece of furniture in our collection and are easy to put on and remove. The embroidery on the back of the covers can be customised with your own brand name/logo.

Available colour: Grey only

CARE & MAINTENANCE

If you want to clean the rain coats we recommend that they are sponged down with a mild detergent and water solution and line dried. The rain coats cannot be machine washed.

STORAGE AND TRANSPORT COVERS

Coco Wolf has developed special covers that protect furniture against dirt and moisture damage in transit or storage. There are special protective casings for the legs inside for extra protection from damage especially when moving furniture.
